

TASMAN DISTRICT COUNCIL
PROPOSED TASMAN RESOURCE MANAGEMENT PLAN

PROPOSED VARIATION NO. 42

Protected Trees

Notified 29 January 2005

EXPLANATORY STATEMENT

Proposed Variation 42 updates the protected tree schedule (Schedule 18.1B) in the Proposed Tasman Resource Management Plan. It is necessary to update the schedule periodically as tree conditions change and as new trees are brought to the Council's attention for inclusion. Some new trees are added; dead, destroyed or lower quality trees are removed; some tree categories are changed; and the species or location of some trees are amended or clarified.

The qualifying criteria under the STEM evaluation system have been reassessed and changed as the Schedule is in danger of becoming too large under the current level of management.

The definition of "pruning" has been altered to clarify that it includes cutting in the root zone.

Reference to "specimen tree" has been changed to "protected tree" to indicate that some trees are located in groups rather than as single specimen trees.

The Council report EP04/11/05 documents the Council's assessment of the issues and management options in compliance with its duties under Section 32 of the Resource Management Act to have assessed the effectiveness and efficiency of the management options in achieving the purpose of the Act.

AMENDMENTS

The Proposed Tasman Resource Management Plan is amended in accordance with the following schedule:

1. **CHAPTER 10**
- 1.1 In **Methods 10.1A.20(a)(i) and (ii) and 10.1A.20(d)(iv)**, **delete** reference to "specimen trees" and replace with "protected trees".
- 1.2 In **Schedule 10B**, **delete** reference to "specimen trees" and replace with "protected trees".
- 1.3 In the last paragraph of **Schedule 10B**, **delete** (a), (b) and (c) and rewrite as:
 - (a) *Category A trees which score over 190 points*
 - (b) *Category B trees which score between 150 – 190 points*
 - (c) *Category C trees which score between 120 – 149 points*

2. CHAPTER 18.1

2.1 In rules 18.1.1, 18.1.6, 18.1.7, 18.1.8, 18.1.9, 18.1.14 and Schedule 18.1B, delete reference to “specimen tree(s)” and replace with “protected tree(s)”.

2.2 In Rule 18.1.7 add new standard (c) as follows:

“The pruning work is not in the root zone of the tree.”

2.3 Amend Schedule 18.1B as indicated below:

KEY: **Bold** = changes *Italics* = deletions Underline = additions.

3. PLANNING MAPS

3.1 The TRMP planning maps are altered to the extent that a new series of maps is provided which shows the additions, deletions and current protected trees as per Schedule 18.1B. Refer to Update maps 21/1 to 21/62.

NOTES:

1. Although the planning maps of the TRMP are legally amended, it is necessary to refer to the separate series of Variation maps (Update map numbers 21/1 to 21/62) as the Area Maps in the map volume are not now accurate for protected trees.
2. The protected tree category is not shown on the Variation maps. It is necessary to refer to Schedule 18.1B in the Variation (and Plan text) to identify any change in category.
3. Where possible, the trunk of the tree symbol indicates the location of the tree (or trees).
4. Where more than two trees are located on the same site and the tree numbers are consecutive, then only one tree symbol is used (to avoid clutter on the maps).
